Guidelines for Practicing the NMT Techniques Under the Supervision of a NMT Fellow

- a) **University Practicum and Internships:** It is encouraged for students to be introduced to the NMT techniques in their university practicums and internships when appropriate under the supervision of an NMT Fellow. No student however, should practice NMT outside of supervision nor use the NMT designation without completing their Board Certification process through the CBMT (MT-BC or equivalent) and taking the NMT training through the Academy.

- b) **Hiring a non-NMT therapist in a NMT based practice:** All music therapists who have not taken the basic NMT training through the Academy, should not be called NMTs nor practice the NMT techniques until they have completed the training. Learning about the techniques in the clinic under direct supervision of an NMT Fellow is still encouraged.
